No worries on the March meeting. Perhaps I could attend the March update and if we have news for April or May, you could attend to introduce yourself?

The health board has a standing meeting every third Thursday of each month. I wanted to provide an update for the board on the overall process we plan to take to complete an RI (negotiate with the PRPs to complete the work) as well as the status of a potential NPL proposal. We'll know by March whether or not the spring proposal will happen. There is a meeting next Thursday but we likely won't have a great handle on next steps by then, so we were trying to push off the update for next month.

Rob

Thanks Rob, This is great information. Unfortunately I will not be able to make it March 19<sup>th</sup> as I am taking leave to go visit my son in Rapid City as he is being deployed to Afghanistan. The week before would work if that is possible? The week after that I am in Denver. March is a busy month!

Otherwise, you can bring me up to speed later. Although I would like to be involved if at all possible.

later,  
Mike

Hey Mike,

It was nice talking with you today. There really isn't an easy way to get you the CFAC site reassessment report since it's a large file. The easiest way is probably to download the report from our website:

<http://www2.epa.gov/region8/columbia-falls-site-reassessment-report>, but it comes in multiple documents.

The narrative is in the document called the "Site Reassessment Report." The data tables are in "Appendix E: Data Summary Tables." The figures are in "Figures 1-7." There are other appendices that you probably should have for your records as well including the well logs, photo log, field documentation, and the lab and validation reports.

Steve Wright is the Environmental Engineer for CFAC. I believe he and the security office are the only remaining employees at the site. Steve has been real easy to work with and is very knowledgeable in regard to the site history. I think there is a good chance that he'll be an asset for the project. His number is 406-892-8211 and his email is [swright@cfaluminum.com](mailto:swright@cfaluminum.com).

Locally, we've worked with Susan Nicosia, Columbia Falls City Manager, 406-892-4391. Mike Shepard, City Council, has also been highly interested in the site. For the county, we've met with Commissioner Pam Holmquist, 406-758-5508. Moving forward, we think it would be best to focus our efforts with the County Health Board. Joe Russell, 406-751-8103, has been our point of contact with the Flathead County Health Department. I'd like to update him at their March health board meeting (scheduled for March 19<sup>th</sup>); I think it would be great if you were able to come as well.

We've also met with former employees representing a couple of unions at the CFAC plant. They are Dave Toavs, 406-250-7301, and Brian Doyle, 406-756-3003. Both helped us identify areas of concern for the site reassessment.

Thanks again Mike.

Rob
